

CTP environnement group – 200 employees, 5 subsidiaries (Singapore, Portugal, Brazil, Canada and US) and one branch in the UK – is a chemical cleaning services company (heat exchangers, boilers, heaters and the like) and a waste water treatment specialist (through its mobile treatment unit fleet).

CTP environment is performing projects in all industries (Oil & Gas, Energy from Waste, biomass, chemistry, middle market).

In line with the development of its activity, CTP environment UK is looking for:

Chemical and mechanical cleaning operator

Tasks

You will be part of small and professional teams on industrial cleaning projects, you will be working mostly in UK industrial sites but will also be asked to go abroad from time to time. You will report to the UK Manager based in Manchester. After internal training, you will have to:

- Perform industrial cleaning on customer's site following procedures according to the project and the use of the company equipment including electro-mechanical cleaning machine,
- Under the supervision of your team leader / supervisor, you will have to achieve cleaning tasks safely and in accordance with QHSE rules and guidance,
- Be proactive for dealing with any operational issue and working as team member, you will report continuously and immediately to your team leader / supervisor any work-related concern,

Profile and skills

- Min 1-2 years' experience as a cleaning operator in industrial environment, ideally in Oil & Gas or Power plant or related industries however we will also consider candidates with previous experience in construction, welding, and mechanical industries
- Hard worker, reliability and ability to travel nationwide (and overseas from time to time) will be key to this role
- Clean driving licence

Salary and benefit

- Fixed salary for stand by time
- Basic between £12,5 and £15.
- Contract type: full time.
- Overtime and night shift allowance.
